

Pure, fresh spring water from a natural artesian well.

Miracle Streams originates from a natural artesian well, deep in the pristine aquifers of the Blue Ridge Mountains.

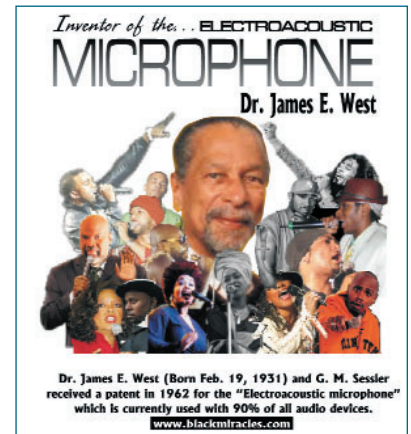

We are proud to offer water that is chlorine free and quality tested for over 90 organic and inorganic chemicals. This water is never stored in open reservoirs or trucked in from other sources.

"The best bottled water I have ever tasted!"
 - Kevin Humphrey, The Humphrey Group

Each Bottle Features the profile of a Great African-American

Miracle Streams will feature monthly profiles of African-American inventors or scientists. Many of these individuals have invented products and processes that are widely used today!

The bottle shown here features Dr. James E. West, inventor of the microphone.

Miracle Streams is a great educational and motivational tool for schools, organizations, retail outlets, churches, corporations, and athletic teams.
